UNIVERSITY OF CALIFORNIA

CATALOGUE

OF

GREENHOUSE PLANTS,
HARDY TREES,
EVERGREEN SHRUBS,

FLOWERING SHRUBS,
BULBOUS ROOTED, AND
HERBACEOUS PLANTS.

ARRANGED BY THEIR

BOTANICAL AND ENGLISH NAMES.

TO WHICH IS ATTACHED

THE PLACE OF THEIR NATIVITY;

With a collection of the most esteemed varieties of

FRUIT TREES,

AND A CATALOGUE OF GARDEN SEEDS.

CULTIVATED AT THE NURSERIES AND GARDENS OF

DAVID AND CUTHBERT LANDRETH,

Federal street, near the Arsenal.

PHILADELPHIA:

Printed for D. & C. Landreth, No. 85 Chesnut street.

1. Ashmead & Co. Printers.

1824.

INDEX.

1824

ADVERTISEMENT.

THE catalogue we now present to our friends contains all the additions we have made to the various departments of our profession since the last one published, and for their gratification we have given both the scientific and vulgar names, and to each species we have attached the place of its nativity.

Many improvements have been made to the establishment, and no pains have been spared to render the collection worthy of public attention. Considerable expense has been incurred in procuring useful and ornamental trees and plants, as well in our own country as in Europe, China, &c.; and from the arrangements we have made with our correspondents in Europe and America, we flatter ourselves our Nurseries will at least retain the character they have formerly possessed.

The collection of Ornamental Plants, both tender and hardy, that we are now cultivating, will be found handsome and extensive, and every exertion will continue to be used to procure the most admired.

The varieties of Fruits which we have chosen will be found judiciously selected. Of many of the fruits the lists could be much extended, but a selection of the most celebrated and esteemed we conceive is most desirable.

For many years past we have grown the greater part of the seeds sold by us, and we have at present a number of acres appropriated to that purpose. They are raised immediately under our superintendence, and every care and attention possible to bestow on them they receive. We disclaim all wish or intention to decry those of others, but from these considerations we are led to believe they will be found superior to any offered for sale unless reared in a similar manner. At present we have about thirty acres occupied by Trees and Seeds, and it is our intention to increase their number as occasion may require.

We return our acknowledgments to those of our friends who have so politely presented us with rare plants, seeds, &c.

many of which on viewing the grounds they will find in luxuriant growth.

Strangers visiting Philadelphia are respectfully invited to view the Nurseries.

Orders left at our Seed Store, No. 85 Chesnut street, Philadelphia, or per mail, enclosing cash, or references in Philadelphia, will meet with the same attention as if personal application were made.

GREEN-HOUSE PLANTS.

<i>Linnæan Name.</i>	<i>English Name.</i>	<i>Native Soil.</i>	
ACACIA,	ACACIA.		
armata,	{ simple-leaved, prickly.	{ New Holland.	\$1 00

BULBOUS ROOTS, &c.

<i>Botanical name.</i>	<i>English name.</i>	<i>Native Soil.</i>	
HYACINTHUS,	HYACINTH.		
orientalis,	garden hyacinth.	Levant.	\$ 0 25

We have chosen for cultivation about twenty different varieties, which we believe are not surpassed by any in the country—they comprise nearly all the various shades and colours, and *single bells* of some of the sorts which we have measured have exceeded a dollar in circumference. Two or three hundred varieties of this beautiful plant are cultivated in Europe, and those we are now offering for sale have been selected from the very best, which (with a few tulips) cost us on importation \$ 300.

TULIPA,	TULIP.		
gesneriana,	garden tulip.	Levant.	12½ & 25

Of this much admired plant we have also a very pretty assortment. It is said that upwards of one thousand varieties of it are cultivated at this time in Holland; but we have thought all that was requisite was to select from the bulk of them the most esteemed. Formerly a most extraordinary traffic in this root was carried on; and to such a pitch of folly had it arrived, that it is said from 1,000 to 10,000 dollars have been paid for a single root. Prince and peasant were alike jobbers, until it was put an end to by the enactment of a law limiting the price, and at the present the finest sorts may be purchased at moderate prices.

NARCISSUS,	NARCISSUS.		
tazetta,	polyanthus.	Spain.	25

RANUNCULUS, asiaticus, <i>A very beautiful assortment, comprising many various shades, colours, and mixtures, \$1 per doz.</i>	CROW FOOT. garden.	Levant.	12½
ANEMONE, coronaria, <i>A pretty collection, comprising the various shades, &c. \$1 per doz.</i>	WIND FLOWER. poppy anemone.	Italy.	12½
IXIA, <i>sp.</i>	IXIA. <i>several beautiful varieties.</i> C. G. Hope.		25

ADDITIONS.

Since the arrangement of the catalogue, the following plants have been received, which will be offered for sale in the autumn of 1825—many of them are exceedingly rare and beautiful, a number of which have been presented by our friend the professor of Botany at Cambridge, Mass. and author of that excellent work, "Genera of North American Plants."

Antholyza cunonia.	Oxalis rubella.
Gladiolus lineatus.	flabellifolia.
Ornithogalum arabicum.	Athanasia capitata.
lacteam.	Echium fruticosum.
Babiana disticha.	Ferraria undulata.

- Alstroemeria pelegrina*.
 Ligtu.
Paullinia sp.
Indigofera tinctoria.
Hedysarum triquetrum.
Humea elegans.
Convallaria japonica.
Amaryllis crispa,
 ——— pulverulenta.
 ——— dark variety.
 ——— purpurea.
 ——— pumilio.
 ——— tubispatha.
 ——— johnsoniensis.
Scilla indica.
Polygala myrtifolia.
Cassia occidentalis.
 ——— glandulifera.
 ——— sp.
 ——— sp.
 ——— riparia.
Mimosa glomerata.
 frondosa.
Othonna fruticosa.
Chironia linoides.
Basella alba.
Basella rubra.
Mespilus japonica.
Hibiscus sp.
Senecio sp.
Begonia argyrostigma.
 nitida.
 hirta.
 humilis.
Canna coccinea.
 nepalensis.
 patens.
 Lamberti.
 sp. from S. America.
 esculenta.
Viminaria denudata.
Morea northiana.
Loperia racemosa.
Globba careyana.
 ——— maranta.
Cyclamen hederæfolium.
Hemimeris urticifolia.
Mesembryanthemum spectabile.
 ——— inlaudens.
 ——— deltoïdum.
 ——— aurantium.
Erythrina sp. from S. America.
Dalechampia capensis.
Salvia splendens.
Gnaphalium stœchas.
- Sisyrinchium laxum*.

Jasminum revolutum.
 gracile.
 glaucum.
Acacia pulchilla.
 ——— decurrens.
Corizema nona.
Phylica rosmarinifolia.
 plumosa.
Podylaria styracifolia.
Kinnesia coccinea.
Hemerocallis japonica.
Celsia linearis.
Pœonia moutan.
 whitlei.
Chrisanthemum.
 superb white.
Geranium sylvestra, *pleno*.

Geranium striatum.	Clematis sweet scented.
Scotch roses, five new sorts, double and very beautiful.	Camellia Japonica.
Sable rose, darkest known.	atrorubens.
Michigan cluster rose.	sasanqua.
New double mottled sweet briar.	pomponia.
Thrift.	Ixia carmasina precox.
Persian white lilac.	Thea imperialis.
Phlox suaveolens.	Diervilla canadensis.
maculata.	Pink, monthly flowering.
Rhamnus catharticus.	Bauhinnia scandans.
Hypericum, nova sp.	Hibiscus diversifolia.
Delphinium grandiflorum.	Crotalaria sp.
Caprifolium pubescens.	Hedysarum sp.
Daphne adora, v. striata.	Buddlea globosa.
cnorum.	Agapanthus ensifolius.
Phormium tenax.	Amsonia latifolia.
Asclepias curasavica.	salicifolia.
arborea.	Glycine frutescens.
	Ailanthus glandulosa.

FRUIT TREES.

APPLES.

25 cents each, or 18 dollars 75 cents per hundred.

Those marked thus * are cider fruit.

Those marked thus † are celebrated for the table and cider

- 1 Juneating, ripe from June to July.
- 2 Early queen, July and August.
- 3 Newtown pippin, very superior, November to June.
- 4 †Pennock's red, October to March.
- 5 Large doctor, October to January.
- 6 Long pippin, January to April.
- 7 †American pippin, November to July.
- 8 †Rambour, August to September.
- 9 French reinette, July.
- 10 Paradise apple, dwarf, July.
- 11 Golden reinette, November to March.
- 12 Autumn Calville, October to March.
- 13 Golden pippin.
- 14 Golden pearmain, November to March.
- 15 Early bough, July to August.
- 16 Maiden's blush, August to September.
- 17 Bellflower of Brent, October to January.

- 18 English codling, August to October.
- 19 Spice Spitzenburg.
- 20 Flanders pippin.
- 21 Cathead, November to February.
- 22 Kentish codling.
- 23 Brunette.
- 24 †Newtown Spitzenburg, October to January.
- 25 White sweeting.
- 26 Red and green sweeting, September and October.
- 27 †Esopus Spitzenburg, November to February.
- 28 Rhode Island greening, October to February.
- 29 Seek-no-farther, November to January.
- 30 Fall pippin, October to December.
- 31 Yellow bellflower, October to March.
- 32 Pomme d'Apis, or ladies, November to January.
- 33 Early harvest, July.
- 34 Collot.
- 35 Jacob apple.
- 36 †Gray house, October to March.
- 37 Vandever, November to March.
- 38 *Virginia or Hughes's crab, November.
- 39 Nonesuch.
- 40 Red summer Colville, September.
- 41 Monstrous bellflower, October.
- 42 Nonpareil, August.
- 43 Shippin's russeting, *much admired for stewing.*
- 44 Royal russet, November to March.
- 45 Priestly, November to March.
- 46 Early summer pearmain, August.
- 47 Fearn's pippin, October to February.
- 48 Loan's pearmain, October to November.
- 49 Margill, November to March.
- 50 Quince apple, November to March.
- 51 Lemon pippin, November to March.
- 52 Kentish pippin, November to March.
- 53 Holland pippin, October to March.
- 54 English nonpareil, November to March.
- 55 American nonpareil, August.
- 56 Ladies' finger, November to April.
- 57 Kaighn's Spitzenburg, December.
- 58 Winter pearmain, October to March.
- 59 Long Island pearmain.
- 60 Ribstone pippin, October to April.
- 61 †Wine sap, November.
- 62 Sweet pippin, November to January.

- 63 Sweet Spitzenburg.
- 64 Sweet vandever.
- 65 Double blossom (ornamental.)
- 66 Siberian crab (preserving.)
- 67 July pippin.
- 68 Gloria mundi, October to January.
- 69 Hay's apple.
- 70 Cart-house.
- 71 *Harrison's.

N. B. The catalogue of apples might be swelled to a much greater size, but it is believed the sorts we have chosen for cultivation will be found among the best. In our selection we have made choice of those that are generally esteemed, and possess some celebrity either as table or cider fruit. Descriptions of most of the apples (as well as the other sorts of fruit which we are cultivating) may be found in that excellent work on fruits of Mr. Cox, of Burlington, N. J. It is a work of considerable importance to the agricultural interest, and should be in the possession of every farmer.

PEARS—37½ cts.

- | | |
|---|----------------------------|
| 1 White lady. | 22 Summer bonchretien. |
| 2 Gray beurre or butter. | 23 Doyenne. |
| 3 Red beurre. | 24 Mouille bouche. |
| 4 White beurre. | 25 Good texmin. |
| 5 Golden beurre. | 26 Sotte bell. |
| 6 July pear. | 27 Supreme. |
| 7 British bergamot. | 28 Peach pear. |
| 8 Paddington pear. | 29 Early muscat. |
| 9 Virgoleuse. | 30 Jargonelle. |
| 10 Gray sugar. | 31 Orange bergamot. |
| 11 Kendrick's early beurre
de roi, <i>very fine</i> . | 32 Large summer muscat. |
| 12 Clifton's beurre de roi. | 33 Autumn bergamot. |
| 13 Early chaumentelle. | 34 St. Germain. |
| 14 Skinless. | 35 Vert longue panacheed. |
| 15 Autumn bonchretien. | 36 Crassan. |
| 16 Seckel's pear.— <i>This is
considered by many as su-
perior to all others.</i> | 37 Hampton Court bergamot. |
| 17 Vine pear. | 38 Green chissel. |
| 18 Verte longue. | 39 Bensel's winter pear. |
| 19 Rousselet. | 40 Wyatt's. |
| 20 Cinnamon. | 41 Wilding of Lassooy. |
| 21 Summer bergamot. | 42 Red muscadel. |
| | 43 Winter thorn. |
| | 44 Tarling. |
| | 45 Citron des carmes. |

- | | |
|---------------------|---------------------|
| 46 Winter bergamot. | 53 Musk pear. |
| 47 Winter beurre. | 54 Washington. |
| 48 Moorfowls egg. | 55 Royal butter. |
| 49 Colmar. | 56 Walnut or point. |
| 50 Poir d'Auch. | 57 Bell pear. |
| 51 August muscat. | 58 Pound pear. |
| 52 Red jennet. | |

The collection of pears might also be easily augmented to twice its size, but a selection of the most esteemed we have thought all that was desirable; and the sorts we have enumerated are generally celebrated either for the size of their fruit or fineness of flavour.

PEACHES.

25 cents each—\$ 18 75 cents per hundred.

Those marked * are clingstones, or those whose flesh adheres to the stone.

- | | |
|------------------------------------|---|
| 1 *Kennedy's Carolina. | 24 *Teton de Venus. |
| 2 Morris's large luscious red. | 25 *Stocker's seedling. |

8 Madeira.	16 Black sweet water.

NATIVE SORTS.

17 Orwigsburg, <i>white</i> .	22 Alexander's, or Schuylkill
18 Bland's Virginia, or Powell	Muscadel, <i>blue</i> .
grape, <i>purple</i> .	23 Isabella.
19 Elsenburg, <i>blue</i> .	24 Scuppernon.
20 Catawba, <i>purple</i> .	25 Worthington.
21 Early white.	

It may be well to observe that scarcely any of the imported grapes ripen their fruit well in the country, except under some peculiar circumstances; and so general is the complaint around Philadelphia, that we have altogether ceased planting foreign sorts. Those under the head of "Native" have been discovered wild, and some of them bid fair to be of considerable importance. It is certain that few of them are to be compared to the fine imported kinds as table fruit, but those we are debarred from in the country. Bland's Virginia is a good fruit, and finely flavoured, as is also the Orwigsburg. The early white and Elsenburg may also be classed among the best of native sorts suitable for the table.

Our vines of the last three in the catalogue have not yet borne, and we are unable to say any thing about them from personal observation. The Isabella is spoken highly of, and said to be nearly equal to some of the fine imported kinds. The Alexander's, Catawba, and Bland's Madeira, or Virginia or Powell grape, have been cultivated as wine grapes, and Major Adlum of the district of Columbia has succeeded in making wine from all of them of a good quality, particularly from the two last mentioned, which has been pronounced excellent.

PARSNIP,			rosemary,		
large swelling,	12½	1.50	sage,		
PUMKIN,	<i>qt.</i>		summer savory,		
of sorts,	25		winter savory,		
PEPPER,	<i>oz.</i>		carraway,		
bell or bull nose,	50		lavender,		
cherry,	50		coriander,		
cayenne,	50		pot marigold, &c.		

In papers of 6 cts. and upwards, or \$4 per hundred, assorted.

EARLY SEED POTATOES, 75
cts. per bushel.

Fox's seedling potatoes, said to be fit for use four weeks earlier than any other kind, \$ 1
50 cts. per bushel.

white onion sets,
yellow onion sets,
garlick—also cabbage, lettuce,
and cauliflower plants in their
season.

FLOWER SEEDS

Put up in papers at 6¼ cents, or \$ 4 per hundred, assorted. Of annual flowers we have an extensive and handsome assortment, but they are not of sufficient moment to give at catalogue in detail.

In our selections of esculent vegetable seeds, we have chosen such as are most generally known and esteemed; of many of the kinds, for instance, cabbage, radish, &c. the names of thrice as many could be given, but we do not conceive any advantage can arise from the cultivation of so many sorts. No garden wants more varieties of each kind than we now offer for sale, and indeed very few ever raise half the number.

We would observe, as the seeds are grown on our own ground, and under our immediate care, we are enabled to warrant them as fresh and genuine.

For the information of those who purchase to sell again, we have given the wholesale prices. At times, owing to a failure in the crop, some of them may exceed the prices quoted in the catalogue, but it will be but seldom, and then to a slight amount.

OBSERVATIONS ON TRANSPLANTING TREES.

As the success in transplanting trees so much depends on the treatment they receive, we have thought it advisable to present a few remarks for the observance of those who have had but little experience on the subject.

On removing trees from the nursery, care should be taken to prevent the roots from drying previous to planting them, otherwise they frequently receive considerable injury; and, in our orders for trees, particular care is taken to preserve them from drying winds before packing. Immediately on their receipt, the bundles in which they are packed should be opened, the roots well watered, and "laid in" until the ground in which they are to be planted is ready to receive them. By laying in is understood the making of a trench sufficient

large to admit the roots, in which they are placed; the earth, having been previously made fine, is then filled in around them, and a gentle watering given, in which situation they may remain with safety until planted. The holes in which it is intended to plant them should, for an ordinary sized nursery tree, be from $2\frac{1}{2}$ to 3 feet in diameter, and about the same in depth. The earth from the bottom should be thrown aside, and its place filled up with good compost or black mould, (no fresh stable manure should be used in the compost.) The tree should be planted about the same depth, or perhaps an inch deeper than it has stood in the nursery; the roots and fibres should be spread out horizontally, and during the process of filling in the earth, the tree shook several times, so as to admit the earth between the roots, and fill up any cavities that might otherwise remain. The earth should be then trodden down, or during the time of filling, and when the excavation is completely closed, the tree gently watered. After the expiration of a short time the earth will have settled, and any hollows that may have formed should be filled up—finishing by forming a basin around the trunk to receive the rain or watering it may be necessary to give it—which it will require, should the ensuing season after planting prove dry. If convenient, a stake affixed to prevent the winds from loosening the earth around the roots would have a good effect, and during the season of vegetation the ground should be kept free from grass and weeds.

Expedition to Mandan

THE END.
